

Will you join our efforts to save more lives?

Yes, I Will Wisconsin

DONATE

Saving lives with Wisconsin's new Donor Registry

Wisconsin has a new online Donor Registry that makes it easier than ever to authorize organ, tissue and eye donation. The Registry will help reduce the number of children and adults who are waiting for a life-saving or life-changing transplant.

- People with an orange donor dot on their license or state I.D. should still sign up.
- The Registry is confidential, protected, private and easy to use. You may add or remove your name at any time.
- The Registry saves lives. Your decision to be registered as a donor may be made 24/7 and is accessible to donation professionals at the time of your death, saving valuable minutes and lives.
- The Registry ensures your decision to be a donor is honored. Adding your name to the Registry makes a legal record of anatomical gift and authorizes donation.
